
(a)
2023, cross-fitted
intercept +0.07, slope 0.94
2024
intercept 0.00, slope 0.89
2025
intercept +0.10, slope 1.20
deciles of predicted risk;
households not matched
to the training year
Observed meal-affordability deprivation
Predicted probability, model trained on 2023
(b)
deciles of predicted risk;
2025 main test set
LightGBM, income + structural
intercept +0.17, slope 1.37
Ridge (linear), income + structural
intercept +0.15, slope 1.43
Lasso ≤6, income + structural
intercept +0.15, slope 1.59
LightGBM, structural
intercept +0.21, slope 1.22
Observed meal-affordability deprivation
Predicted probability, models trained on 2023–2024
